

Instruction Manual

REWITEC® PowerShot® S/M/L

Treatment of Gasoline- and Diesel Engines with Products of the REWITEC® PowerShot® family

Thank you for having purchased one of our innovative products! By using the worldwide approved REWITEC® PowerShot® with optimized recipe and patented metal-silicate coating technology you can, amongst others achieve the following:

- Reduction of fuel consumption
- Reduction of harmful particles and emissions
- Longer lifetime
- Optimization of engine power
- Reduction of oil consumption
- Improvement of cold start
- Improvement of engine smoothness

You have definitely stepped in the right direction to protect your engine long-term, reduce costs at the same time and also contribute positively to the environment. There are various (compatible with each other) sizes of the PowerShot®, which are adapted to the engine size. Thus for an engine size of 5.000 ccm you would use e.g. a PowerShot® M (for an engine size up to 2.000 ccm) plus a PowerShot® L (for an engine size up to 3.000 ccm). Should you have any questions, please contact us under support@rewitec.com or by telephone **+49 6441 445990**.

Application for 4-stroke engines

1. The engine should have reached operating temperature, but should, however, have run at least 15 minutes.
2. Shake the REWITEC® PowerShot® well for about 1 minute.
3. Add the complete content of the bottle(s) to the warm engine oil.
4. Subsequently drive the vehicle for approx. 15 minutes.
5. The treatment will be finished after approx. 1.500 km (do not carry out an oil change during this time).

Application for 2-stroke engines (motorbikes and -boats)

1. The engine should have reached operating temperature, but should, however, have run at least 15 minutes.
2. Shake the REWITEC® PowerShot® well for about 1 minute.
3. Add the complete content of the bottle(s) to the half-full fuel tank
4. Subsequently drive the vehicle for approx. 15 minutes.

Safety Advice:

Must not be handled by children. Do not drink the liquid. Avoid skin contact. May be slightly irritating to the eyes. Rinse thoroughly with water and consult a doctor in case the irritation does not disappear. Do not pour into or place next to open flame.

Storage Advice:

Products must always be stored upright! Please, store at room temperature.

PowerShot® S:	Treatment for cars, motorbikes and boat engines up to 600 cm ³
PowerShot® M:	Treatment for all types of engines up to 2.000 cm ³
PowerShot® L:	Treatment for all types of engines up to 3.000 cm ³
