

Product Datasheet

REWITEC® PowerShot® 10/15/20/50

Product: REWITEC® PowerShot®
10 / 15 / 20 / 50

Description: Coating Concentrate for Combustion Engines

Sales Unit: Bottles in different sizes

Technical Data

Name:	REWITEC®-Coating Concentrate
Colour:	anthracite
Pourpoint:	-30 °C
Flashpoint:	220 °C
Density at 15 °C:	873 kg/m³
Solubility in water:	no
Basic viscosity at 40 °C:	98,6 mm²/s
Dosage:	according to bottle labels and instruction manual

Product Characteristics

- Reduction of fuel consumption
- Longer engine life
- Optimisation of engine power
- Reduction of oil consumption
- Decrease of output of harmful particles and emissions
- Reduction of wear and abrasion, as well as reconditioning of frictional metal surfaces
- Reduction of vibrations and noise
- Durable wear protection
- Optimisation of lubrication film and emergency running properties in case of oil loss
- Surface finishing during operating (without downtime)
- Therefore reduction/prevention of costs of idleness
- Reduction of spare parts demand
